RE: F. Susan Rasche
The Effects of Ambiguity Tolerance on Relapse and Health Outcomes in an
Outpatient Alcohol Treatment Program

Dear Dr. Lasser:

The purpose of this letter is to grant F. Susan Rasche, a student at Texas State University, permission to conduct research at Texas NeuroRehab Center. The project, "The Effects of Ambiguity Tolerance on Relapse and Health Outcomes in an Outpatient Alcohol Treatment Program" entails collecting survey data from patients participating in our Intensive Outpatient Program (IOP). There is no expectation that results, other than in published format, will be shared with Texas NeuroRehab Center.

We do hereby grant permission to F. Susan Rasche to conduct her research (The Effects of Ambiguity Tolerance on Relapse and Health Outcomes in an Outpatient Alcohol Treatment Program) at Texas NeuroRehab Center.

Sincerely,

Ed Prettyman, Psy.D.
Chief Executive Officer
