Attachments:

Li,

Thank you for your quick reply to my email re your Human Subjects Application.

Your request for a review of your proposed research "The Effects of Teacher Preparation and Professional Development on Special Education Teacher Quality" has been completed under Category II, expedited process. You addressed two concerns and there are no problems with the research design as it relates to human subjects. This e-mail is an approval and your research may proceed as described.

As a reminder, you must comply with Part D of the Campus Policies on Human Subjects requiring notification at the time data collection begins and when it is done. You may accomplish this with a simple e-mail to Maggie Bryan-Peterson or me.

Good luck with your research.

Barbara
