Dear Dr. Lasser,

The Heritage Program at Seton Edgar B. Davis Hospital in Luling, TX is a mental health treatment program that provides individualized treatment to older adults who suffer from psychiatric, emotional, or behavioral disorders. The Heritage Program provides outpatient group and individual therapy, and is staffed by a licensed multi-disciplinary team including a psychiatrist, registered nurses, social workers, and counselors. Heritage has a group of clients who have recently been diagnosed with ADHD by our psychiatrist, Dr McColl. They are all in a treatment group that focuses on ADHD-specific issues.

Erin Henry was an intern at Heritage last Spring and Summer semesters. During her internship, we became aware of her interest and skills in research. We are interested in conducting a research study on our ADHD group and have asked Erin to help guide this study.

The staff at Heritage is fully aware and supportive of Erin Henry and Dr. Sally Hill Jones' study at our agency. Our clients have been involved in this process and are aware and excited about participating in such an exciting research project.
