

CONSENT TO PARTICIPATE IN RESEARCH

Invitation to Participate

Vita Haake, a student researcher at Texas State University-San Marcos, is conducting a study on academic/workplace collaborations and internships as the basis for a thesis in the MA in Technical Communication degree. You are invited to participate in this study because of your recent service-learning internship experience with National Instruments in ENG 5312.253 in spring 2009.

Purpose

This study has two objectives:

1. To identify benefits and challenges of these experiences to better understand how students make the transition from an academic setting to a workplace setting.
2. To identify various "workplace literacies" and how they are obtained.

Description of Procedures

I [Vita Haake] will be reviewing your written proposals, discourse analyses, and evaluative reports from ENG 5212.253 in spring 2009 and collecting information from them. You will also be asked to complete an online survey asking for your thoughts and experiences regarding your internship experience with National Instruments.

Risks and Inconveniences

There are no risks involved in this study. The time needed to complete the survey should be minimal (approximately 10 minutes), and can be completed online, which should not be an inconvenience.

Safeguards

No safeguards are needed for this study as there are no risks involved.

Confidentiality

Responses will not be linked to your own name or address, and there may be no follow-up sessions. Direct quotes from your papers and the online survey may be used in the thesis, but they will not be linked to your own name or address.

Voluntary Participation

Participation is voluntary. You do not have to participate in this study if you do not want to. If you agree to be in this study, but later change your mind, you may withdraw at any time. If the length of the online survey is inconvenient for you, you may stop the survey at any time without any consequence to you. There are no consequences of any kind if you decide you do not want to participate.

Benefits

Although there is no direct benefit to you for participating in this study, I feel your participation will likely benefit future research and learning on the topic.

Questions

If you have any questions about this study I will be happy to answer them now. If you have any questions in the future, please contact me, Vita Haake, by mail, phone, or e-mail: 3220 Duval Rd #2818, Austin, TX; (512) 758-0223; vhaake@gmail.com. You may also contact my research advisor, Libby Allison, via phone or e-mail: 512-245-3733; lallison@txstate.edu. If you have any questions about your rights as a research participant, you may contact the Texas State University Institutional Review Board at 512-245-2314.

☒ I agree to participate in this research study.

Hi Kip,

Just following up on this. I turn my proposal in near the end of this semester, which is coming quick, so I'm trying to make sure I've got everything I need.

Thanks!
