To Whom It May Concern:

Erin Oliver is conducting an educational study at Clear Creek High School as part of her Undergraduate Honors Thesis under my supervision. Her study is innovative in the field of education in the sense that integrates aspects of mathematics learning and brain dominance.

Erin worked last semester conducting the literature review, formulating research questions, and developing a plan for instrumentation and data collection. Each stage has been fully supervised and approved by me.

This semester, Erin is focusing on the next two stages of the process. The IRB approval and the plan for analyzing the data. I have read, discussed, and approved all the documentation required for the IRB synopsis of proposal and the consent form.

Please contact me if you have any questions regarding the study or the progress of Erin towards the completion of her Thesis.

Sincerely,

M. Alejandra Sorto, Ph.D.
